GUIDED FERN WALK

SATURDAY AUGUST 10th 9-11 AM

MONTAGUE RD

Shutesbury, MA

Led by Randy Stone,
Pioneer Valley Fern Society

Sponsored by the M.N. Spear Memorial Library

This 1.5 mile stretch of road contains 20 fern species, almost all along the roadside. Come learn the 10 most common local ferns, and some of the uncommon ones too, including Narrow Beech, Marsh, Crested & Ebony Spleenwort.

Meet at the parking lot across from #153 Montague Rd & carpool to the next parking lot across from #325. We'll start with a short description of how to identify the most common ferns, and then see them & many more as we walk down the road. Generally easy road side walking.
